

Learning objective: I can.....

Lesson 6 of 6

PoS 1b,1c,4a

Recognise changes which need to be made to a database.

QCA Unit: 4C

## Resources

### Software you could use:

2question+ (Part of the 2Simple Junior Software package) This is the best software to use when introducing the children to branching databases on the computer  
Decisions - this software is excellent for extending the more able children

### Support files:

## Setting the scene (5 mins)

Share the learning objective with the class. Explain to the class that they are going to look at each others databases and identify the positive areas within it and the areas which could also be improved.

## Main Input (5 Mins)

## Activity – short focused task (5 mins) integrated task (30 mins)

## Review and recall (10 mins)

Bring the class together and review the learning objective.

Once every group has completed their database they can look at other databases created by the class in either the Short Focused Tasks or the Integrating Task and consider some of the key questions:

### Key questions to ask and to display:

- Has the database been completed correctly, i.e. does it work?
- Could any of the questions have been written in a more concise way?
- Are there any other questions that could have been used?
- Could the database have been created in a different way?

### Vocabulary:

question box, branching database
